

# Neutral Salt Rectifier #2

Neutral Salt Rectifier #2 are a blend of chloride salts added to neutral hardening salt baths to neutralize alkalinity due to sodium oxide build up in the salt.

## Features & Benefits

|            |   |
|------------|---|
| Pelletized | <p>Safe and easy to handle</p> <p>Easy dosing by pellet count or weight</p> <p>Eliminates caking issues in humid use environments</p> |
|------------|---|

## Operating Conditions

Neutral Salt Rectifier #2 are best added to molten neutral salt baths by loading them in a basket that is then immersed in the molten salt. The basket should be introduced slowly to the molten salt.

### Dosing

80 grams (11.2 pellets) per 100 pounds of molten neutral salt will reduce the Sodium Oxide 0.01%.

### Example

1000# of neutral salt with a Sodium Oxide level of 0.02%.

The addition of 800 grams (110 to 112 pellets) will result in a rectified Sodium Oxide level to 0.01%.

## Caution

Wear appropriate PPE (personal protective Equipment) when handling; especially when introducing Neutral Salt Rectifier #2 to the molten neutral salt bath. Best when stored in a cool dry environment.
